ProActive Maintenance Contracts

Fluid Power is one of the most reliable forms of power and motion control available for industrial machinery. The key to reliability is in planned comprehensive ProActive Maintenance. 80% of the problems encountered in hydraulic systems are related to inadequate contamination control practices.

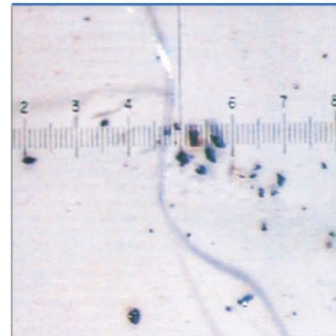

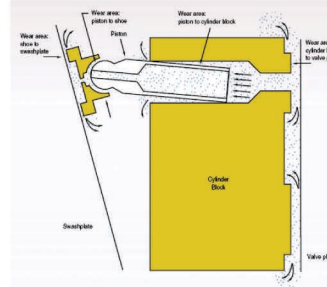

Today, companies have downsized maintenance departments and as a result have lost their hydraulic tribal knowledge. Perhaps it is time to trust the experts of Price ON-SITE to manage your hydraulic assets. Ask yourself these questions:

- Do you experience lost production time due to hydraulic failures?
- Are you paying excessive amounts for new oil and disposal?
- Are you tired of leaky, oily messes?
- Are you constantly sending out components for repair?

Our comprehensive ProActive Maintenance programs are proven to provide return on your investment. Our trained field technicians and fleet of mobile hydraulic service trucks will solve your leaky machine headaches while reducing breakdowns and prolonging component life. When problems occur, our 24/7 service gets you back on-line in a hurry.

Call us today for your free audit at 262-369-2147.
